

YOUR BUILDING

'building sustainable business'

October 2005

Commencement Announcement & Industry Survey

Keith Hampson, CEO of Australia's Cooperative Research Centre (CRC) for Construction Innovation, is pleased to announce the formal commencement of the **YOUR BUILDING** project and the appointment of Dr Tony Stapledon as Project Leader. As an architect and economist Tony has experience in both design and business, both essential skills for the realisation of this exciting partnership project between the CRC for Construction Innovation, the Australian Greenhouse Office (AGO) and the Australian Sustainable Built Environment Council (ASBEC).

So what is **YOUR BUILDING**?

Imagine a single location where you can access all the latest information on how sustainable commercial buildings can help the profitability of your business, as well as leading technical advice regarding sustainable approaches to design, financing, construction and operation of commercial buildings. **YOUR BUILDING** is that place. A web site that acts as an information portal and consolidates available knowledge, builds links to other material and provides access to current research and real-life case studies on sustainable commercial buildings.

YOUR BUILDING sets out to change market behaviours. As such, it will rely heavily on you and your colleagues in the design, construction and property industries and those who own or work in commercial buildings to get involved.

The linked **survey** is the first step in ensuring that all stakeholders have the opportunity to participate in this great project. We want to understand both your expertise and your needs. Material gathered from the survey will be the first point of discussion at the initial industry **scoping workshop** to be held in November and the first step in formalising of the **YOUR BUILDING** content development process.

If you want to have your say about sustainable commercial buildings, have an interest in authoring a section of the website or want to tell us what information is lacking in the industry, then please make sure you participate in the survey by clicking on the attached link and answering a few questions.

We need your responses by November 1st so please visit now:
